CLEANING INSTRUCTIONS

- Avoid leaving the boot dirty for too long. Clean your boots after each use with water, using a soft brush and mild detergent.
- Rinse off any remaining dirty and detergent with water.
- Regularly clean and replace the insole (if used) to prevent bacterial growth. When replacing the insole, make sure it matches the original one.
- Let your boots dry naturally and in a well-ventilated area, away from direct heat or sunlight.
- Always remember that correct and consistent cleaning helps to extend the life of your boots.
